

EUROPEAN TERATOLOGY SOCIETY

Dedicated to the prevention of adverse effects on reproduction

Become an exhibitor or sponsor at the 44th annual European Teratology Society Meeting, 11th to 14th September 2016, Dublin, Ireland

Dear Colleague,

Together with Shay Giles, Vice President Elect of the European Teratology Society (ETS), I am pleased to invite you to be an exhibitor or sponsor at the 44th annual meeting to be held from 11th to 14th September 2016 at The Alexander Hotel in the city center within walking distance of the many cultural sites and hostels that Dublin has to offer.

With the aid of sponsors and exhibitors like you, we finance world-class presentations from the most respected scientists in the field. By keeping the registration fee and accommodation costs to a minimum, we once again expect to have around 200 participants. Each year, the meeting attracts the key pharmaceutical, chemical and contract research scientists in the field together with representatives from industry, academia, regulatory authorities, healthcare and government institutions. The ETS highly values your support and believes that discussions and exchanges between sponsors and the society members are of utmost importance and mutual benefit.

The ETS programme will provide multiple opportunities for exhibitors to present information on their products or services pertinent to regulatory toxicology, teratology and reproductive health. The meeting and hotel rooms are once again located on one site at the conference venue and accommodation options will be available to meet all budgets. Your company's business development and/or scientific representative will find an informal and friendly atmosphere to encourage networking and efficient exchange with the delegates at the social events including the Welcome Reception and Conference Dinner. In addition, lunches and coffee breaks held during the conference will take place **directly in the exhibition area**. There will also be free communication sessions, a poster session and the 3rd ETS Young Scientists Symposium.

Key topics for ETS 2016 include:

- A special education course on Juvenile Toxicity
- Maternal Health in Pregnancy
- Developmental and Reproductive Toxicology: Regulatory Updates
- The Placenta
- ETS-Teratology Society Debate
- ETS and Elsevier Publication Award Lectures

Do not miss this opportunity to promote the expertise of your company in these or other related fields pertinent to regulatory toxicology, teratology and reproductive health.

EUROPEAN TERATOLOGY SOCIETY

Dedicated to the prevention of adverse effects on reproduction

The ETS is recognized as a non-profit organization of public benefit and can issue statements of donations for tax purposes.

More information on sponsor and exhibitor opportunities, as well as available booth space, is given in the attached documentation. If you are able to sponsor our 2016 meeting in any way, Pia Schröder from our congress organizers at Solution Office (see contact details below and on the ETS website <http://www.etsoc.com>) is waiting for your call!

We look forward to hearing from you and hope you will be able to support us working towards the prevention of adverse effects on reproduction

Yours sincerely,

Manon Beekhuijzen

President, European Teratology Society
