

## ***Biosketch Pieter Annaert***

Pieter Annaert graduated as a pharmacist from KU Leuven in 1994 and obtained his PhD from the same university in 1998. During 1999-2000 he completed a postdoctoral fellowship at the University of North Carolina in Chapel Hill. Between 2001 and 2005, he was a (senior) scientist in the division of preclinical pharmacokinetics of Janssen Pharmaceutica (J&JPRD, Belgium). In 2006 he joined the KU Leuven Drug Delivery and Disposition lab, where he is currently full professor in the field of Mechanistic Pharmacokinetics focusing on hepatobiliary drug disposition, drug transporters, drug interactions, drug-induced hepatotoxicity, pediatric drug development, transplacental pharmacokinetics and physiologically-based pharmacokinetic (PBPK) modeling. He is currently supervising a group of 7 PhD students and 1 postdoctoral fellow. In the past 15 years, he has been promotor or co-promotor of 21 PhD researchers and guided more than 50 Master theses. Prof. Annaert has (co-) authored 141 research articles and several book chapters and currently serves on the editorial boards of Drug Metabolism and Disposition, Xenobiotica and Current Therapeutic Research. Since 2020, he is the chair of the KU Leuven Department of Pharmaceutical and Pharmacological Sciences. His teaching duties in the KU Leuven Faculty of Pharmaceutical Sciences include Drug Life Cycle, Introduction to Pharmacokinetics, Drug compounding and Advanced Drug Development. He is co-founder and scientific advisor of the bioanalysis and pharmacometrics service company BioNotus (Niel, Belgium).
